

# Shishir Kumar

Backend Developer | Quick Learner | Seeking New Challenge

Address: Greater Delhi Area, India  
LinkedIn: <https://www.linkedin.com/in/shishir-kumar-b69b20134/>

- As a Laravel Developer, I developed and maintained web applications using PHP, Codeigniter, WordPress, Rest API, and Node JS. I worked with a team of developers and designers to deliver high-quality and user-friendly products for various clients. I also integrated payment gateways and other third-party services to enhance the functionality and security of the applications.
- I have a BCA degree in Web/Multimedia Management and Webmaster from Lovely Professional University, where I learned the fundamentals of web development and design, as well as various programming languages and frameworks. I have also obtained multiple certifications in PHP, Personal Computing and Networking Essentials, and Information Search and Analysis from reputable institutions. I am proficient in MERN Stack, HTML5, and PHP, and I am always eager to learn new technologies and tools to improve my skills and knowledge. My goal is to find a new challenge where I can apply my expertise and passion for web development and contribute to the success of innovative and impactful projects.

## EXPERIENCE

### grapes, New Delhi

February 2022 - March 2023

#### Laravel Developer

- Developed and launched a Laravel-based web application in 3 months that resulted in a 20% increase in user engagement.
- Created and maintained 3 dynamic web applications built on Laravel, resulting in 40% increase in user engagement in 8 months.

### DIAM RESOURCES PRIVATE LIMITED, Noida

July 2021 - January 2022

#### PHP Developer

- Improved PHP application performance by 25% in 3 months, reducing page load time by 1.5 seconds.
- Migrated a legacy PHP application to a cloud-based platform, resulting in significant cost savings and performance improvements.
- Developed and implemented new PHP security features that have prevented multiple hacking attempts.

### SISL Infotech, New Delhi

March 2021 - June 2021

### PROJECTS

## Donear

*June 2022*

- The Donear website is a B2B e-commerce platform for fashion and lifestyle products. It is a complex platform with a wide range of features, including:

- A large catalog of products from over 100 brands
- The ability to search and filter products by category, brand, price, and other criteria
- A variety of payment options
- A secure checkout process
- Order tracking and management features
- The Donear website is also integrated with a number of other systems, such as ERP systems, CRM systems, and logistics systems. This integration allows Donear to provide a seamless experience for its customers, from product search and discovery to order fulfillment.

---

## **Eicher Truck and Buses**

*February 2022*

- Here are some of the specific features of the Eicher Trucks and Buses website that I am particularly proud of:
- The website is designed with a clean and modern layout that is easy to navigate. The website uses high-quality images and videos to showcase Eicher's products and services. The website includes a variety of features that make it easy for customers to find the information they need, such as a search bar, product filters, and a dealer locator. The website is mobile-friendly and can be accessed from any device. The website is secure and uses the latest security technologies to protect customer data.

---

## **Raymond Consumer Care**

*May 2022*

---

## **Relaxo Footwear**

*September 2022*

- The website is a complex e-commerce platform with a wide range of features, and it is important to build the website that is both user-friendly and scalable.
- One of the most important aspects of the project was to ensure that the website is fast and responsive. Customers should be able to find the shoes they are looking for quickly and easily, and they should be able to complete their purchase without any problems. I plan to use a variety of techniques to improve the website's performance, such as caching, minification, and code optimization.

---

## **SCIMOOC**

*February 2022*

- The main goal of the course is to "provide learners with the knowledge and skills they need to develop and teach high-quality massive open online courses (MOOCs)." The course covers a wide range of topics, including MOOC design, pedagogy, production, and assessment.
